

New Bell & Gossett Product Info and Literature App

iPhone - iPad - Android Devices

Xylem's Bell & Gossett brand is pleased to announce the release of an iPad, iPhone and Android device version of its new mobile product and literature catalog. The application is free of charge and can be downloaded from the [iTunes App Store](#) or the [Google Play Store](#).

The Bell & Gossett Mobile Catalog brings the most current product information, documentation and images for the full B&G product line to your iPhone, iPad and Android device.

- Quick product search by product name, category, type
- Quick literature search by document ID, title or product name
- Easy view and sort by product categories and types
- One touch access to related brochures, submittals, specifications, performance curves, drawings, part lists, and installation & operation manuals.
- Options to view and email documents from inside the B&G Mobile Catalog app or choose your PDF reader of choice (google docs for Android version)
- Includes easy search for your local representative and in-app access to the upgraded mobile-friendly Bell & Gossett web site
- Always have the most recent updates to product and literature information - instantly updates whenever you are online and open the application.
